

Android Devices Confirmed by Customers & Support

To install PocketDairy Android with the latest data and input features, you need PCDART version 7.15.1 or later, and a device with Android 2.2 or later.

The list below includes devices used or supported by DRMS staff. **Keep in mind that any device with Android 2.2 or later should run PocketDairy Android.**

Several customers are now using non-phone Android devices in handheld or tablet size. New devices come on the market constantly. If you have questions about installation or hardware for PocketDairy Android, contact your DRMS. Customers are giving us rave reviews, and we think you'll find PocketDairy Android an indispensable tool for information and management.
